

Debugging Techniques

- Read Error message!
 - Syntax Error
 - Runtime Error
 - Semantic Error
- Google the problem/Error message
- Debugger
- Add print-statements (logging)
- Introspection (checking shapes and types,...)
- Slicing - divide and conquer-approach
- Clean and simplify your code -> writing functions (generalize)
- Write comments and docstrings
- Restart your Jupiter-kernel
- Minimize your input-data
- Read the documentation
- Rubber Duck Debugging
- Taking breaks
- Talk to people/code review
